CUSTOMER NOTICE

WHAT: Recycled Waterline Installation
WHEN: June 2009
WHERE: Fullerton Road from Arenth Avenue South to Galatina St.
WHY: Expanding the Availability of Recycled Water for Commercial Irrigation and Industrial Uses

Rowland Water District is proactively seeking methods to reduce its dependence on imported water supplies from Northern California and the Colorado River. Recent judicial decisions rendered to protect endangered species and extended periods of below-normal rainfall have significantly reduced the availability of water from Southern California's two vital sources.

The expansion of the recycled water system will provide commercial business corridors an opportunity to utilize this safe and reliable water resource for their irrigation or industrial uses. Rowland Water District has scheduled the installation of a recycled water pipeline to begin in June 2009; the anticipated completion date is May 2010. The installation will take place on Fullerton Road, starting at Arenth Avenue and extending south to Galatina Street. Reasonable efforts will be employed to minimize the impact of a waterline installation project of this size and scope. We apologize for any inconvenience and sincerely appreciate your patience.

Please refer to project limits defined in the attached map.
